Work Experience

2016 - present	Project Analyst <i>Progressive Software International; Windsor, ON</i> <ul style="list-style-type: none">• Lead the change from a waterfall environment to an agile environment, allowing for quicker release times of development changes, better tracking of projects and easier management of scopes and time constraints• Lead a development team of 6 developers in using modern development tools that allow for a more efficient and easier onboarding of new employees.• Implemented a continuous integration build inhouse to test deployments before going out to clients. This was a substantial change for a company that to date had relied solely on their developers to ensure any changes completed did not affect other parts of the system• Increased efficiencies by developing an automatic update procedure so that client software is updated automatically instead of the traditional manual process. This increased client updates from 3 annually to over 30 in a single week• Developed a web application, giving end-users the ability to interact with the desktop application through a more modern web platform. Worked to reverse engineer parts of the desktop application to expose and reuse business logic for the web application
2014 - 2016	Business and Software Analyst <i>Progressive Software International; Windsor, ON</i> <ul style="list-style-type: none">• Worked in a one on one capacity with clients, assessing business needs and identifying solutions in the software to address client needs• Gathered business requirements from clients and prepared product designs and estimates• Worked with a team of 4 developers to develop and maintain the desktop based application• Provided both remote and on-site training sessions dealing with data entry, analysis and management
2012 - 2014	Web Developer <i>Progressive Software International; Windsor, ON</i> <ul style="list-style-type: none">• Worked in a team of four, developing a web application for commodity brokerage shipment management• Designed and developed a data integration process between an outdated desktop application and the web application• Resolved system bugs reported by clients and performed maintenance and upkeep of the web application

Education

2011 - 2012	Masters of Business Administration <i>Odette School of Business, University of Windsor; Windsor ON.</i> <ul style="list-style-type: none">• 13 month program with a business consulting component in coordination with Crayola Canada LLC.
2007 - 2011	B. Comm (Honours Business and Computer Science) <i>Odette School of Business, University of Windsor; Windsor ON.</i> <ul style="list-style-type: none">• Combined degree encompassing a B.Sc in Computers and a B.Comm with a cooperative education work component

Extracurricular and Volunteer Work

2016 - present	<div>Board of Directors - Emerging Leaders Representative</div> <div><i>Windsor-Essex Regional Chamber of Commerce</i></div> <ul style="list-style-type: none">• Appointed to a new position as a representative for the young professionals network component of the Chamber of Commerce• Attend monthly board meetings to discuss and vote on the strategic operations for the Chamber and it's membership• Voting on motions to be presented to the Ontario and Canadian Chamber of Commerce• Oversaw a doubling in the membership of the Emerging Leaders group and strengthened their connection with the chamber, allowing Emerging Leaders members to benefit from chamber discounts
2017 - present	<div>Marketing Director</div> <div><i>Windsor-Essex Emerging Leaders</i></div> <ul style="list-style-type: none">• Created the Emerging Leaders twitter account, reaching over 300 followers in its first 4 months• Designed the Emerging Leaders mailing list, delivering information regarding events and opportunities to a network of 200 subscribers
